Please, please, DO NOT pass any laws that will allow passengers to talk on their cell phones while in flight. As it is, they do not pay attention to the safety demos. If they are allowed to use phones, they won't hear/see anything. As it is, they sneak the use of their phones and almost every flight I have to tell someone to turn it off. Not to mention how annoying it will be to those around the talker who only want a little peace and quite which is getting hard and harder to find. Give us a couple of hours on an airplane. Thank you!
